I, the owner or legal agent of this pet, authorize the veterinarian and staff at this hospital to perform the above procedure(s). I understand that there are risks with any anesthesia and surgery. My signature on this form indicates that I understand the procedure that will be performed, the possible complications, which does include death, and have received an estimate of the costs involved in this procedure.

We require the Pet Health Screen II before anesthesia and surgery to ensure that your pet is healthy. These tests are similar to those your physician would perform for you. In addition, these tests will serve as reference values for future use should your pet become ill. We **recommend** the Pet Health Screen III as your pet ages. The complete blood count assesses anemia, infection and clotting. The pre-operative panel assesses the health of the kidneys and liver, status of hydration and blood sugar levels. Electrolyte levels demonstrate acid-base balance and the thyroid level determines the level of circulating thyroid hormone.
